RELEVANT EXPERIENCE

SOFTWARE ENGINEER

CrisduLabs - Crisdu Moda Intima LTDA

AUGUST 2021 - Present

- Lead the web developer's team;
- Define the standards and technologies used in the projects;
- Configure Linux virtual environments, using Nginx or Apache, to release the applications on the web;
- Develop and plan the company's own E-commerce platform, a tool created to provide a low code experience to the sales teams, where the entire sales website can be customized through a CMS;
- Develop the company's own Kanban solution, a tool awarded TOP 13 in Innovation and Transformation, in Brazil, by AEVO, in 2023;
- Create REST APIs in Node.js and Python;
- Develop the Order Picking project;
- Develop the virtual office used by all distributors;
- Organize and control the project's Git repositories, reviewing and approving/reproving the Pull Requests created, along with code versioning;
- Work on the development of several Web Apps, using TypeScript, Next.js, React, Django, jQuery, Tailwind CSS, Sass, among other technologies.
